

The Industrial Revolution

Group 2

The Industrial Revolution began in Britain and changed human life in many ways. Steam power, new machines, new technology, and the creation of factories all changed the way we lived.

Your group is going to debate the most important invention of the Industrial Revolution.

1. Research the inventions from the **list below**. What is it? Why is it important?
2. **Choose one** that you feel had the greatest effect on human life.

Inventions
Refrigeration
Dynamite
Steam ships
Trains
